

KITSAKIS GEORGIOS

M.Sc AI & Data Science | Data Engineer

Athens, Greece • kitsakisgk@gmail.com • +30 6985774053 • [Portfolio](#) • [GitHub](#) • EU Citizen — no work permit required

PROFESSIONAL SUMMARY

Data Engineer with a strong foundation in designing and building scalable data platforms, cloud data warehouses, and ETL pipelines using Azure Databricks, Delta Lake, and Azure Data Factory. Experienced in medallion architecture, data modeling, and end-to-end pipeline delivery across financial services. Holds an M.Sc. in AI & Data Science from AUEB (8.14/10) and brings ML fluency (PyTorch, scikit-learn) that bridges engineering and analytics. Passionate about data platform architecture from schema design and data governance to cross-domain integration, with a long-term goal of growing into a Data Architect role. Google Solution Challenge Global Top 10 Finalist.

TECHNICAL SKILLS

Data Engineering: Azure Databricks, Delta Lake, Apache Spark, Azure Data Factory, Apache Kafka, Informatica (IICS, PowerCenter), SSIS

Cloud & Warehousing: Azure (ADLS Gen2, DevOps), Databricks Lakehouse, Medallion Architecture, Data Modeling, CI/CD, Docker, REST APIs

Languages: Python (pandas, NumPy, scikit-learn, PyTorch), SQL (Oracle, MS SQL, PostgreSQL), Java, JavaScript

Tools & Visualization: Git, Power BI

WORK EXPERIENCE

Data Engineer | **Intrum Hellas** | *Apr 2026 – Present*

- Contributing to enterprise Data Warehouse architecture design using medallion architecture on Azure Databricks.
- Building and optimizing scalable data pipelines with Azure Data Factory and Delta Lake for the Greek market.

Data Engineer | **Accenture** | *Nov 2024 – Mar 2026*

- Built and maintained ETL pipelines using Informatica PowerCenter and SQL (Oracle, MS SQL) for banking loan data processing
- Implemented data quality workflows and validation frameworks for production systems
- Worked with cloud ETL tools including Azure Data Factory and Informatica IICS

Junior Software Developer | **DeltaFoods SA** | *Mar 2024 – Oct 2024*

- Developed optimized SQL queries and backend data models to support analytical data layers
- Maintained business applications built on C#/.NET and PHP.

FEATURED PROJECTS

BloodCall — Google Solution Challenge Top 10 | *Node.js, REST APIs, Google Cloud* [\[GitHub\]](#)

- Co-developed a blood donation matching platform reaching the global Top 10 of Google Solution Challenge 2023
- Built backend REST API services connecting donors with hospitals in real time

Smartphone Activity Recognition | *Python, CNNs, TensorFlow* [\[GitHub\]](#)

- Designed and trained CNN, CNN-LSTM and CNN-GRU models for activity classification from smartphone sensor data — Bachelor's thesis

EDUCATION

M.Sc. AI & Data Science | Athens University of Economics and Business | *Oct 2024 – Apr 2026* | **Grade: 8.14/10**

B.Sc. Informatics & Telematics | Harokopio University of Athens | *Oct 2019 – Sept 2023* | **Grade: 7.3/10**

Erasmus Exchange — University of Malaga, Spain (6 months)

CERTIFICATIONS

Databricks Certified Data Engineer Associate | Databricks | *Issued Aug 2026 · Expires Aug 2028*

Credential ID: 191812712 | [Verify credential](#)

AWARDS & LANGUAGES

Awards: Google Solution Challenge 2023 — Global Top 10 Finalist

Languages: Greek (Native) • English (C2) • Spanish (B1) • German (A2 — in progress)
