AWARDS

Google Solution Challenge - Top 10 Finalist (2023)

[Certificate](#)

LANGUAGES

- Greek (Native)
- English (C2)
- Spanish (B1)
- German(A2-Learning)

PROFILE

Data Engineer specialized in building ETL pipelines and ML solutions with modern data stacks including Informatica, Databricks, and Apache Kafka for cloud streaming (Azure). Proficient in Python (PyTorch, TensorFlow, scikit-learn) for ML development and SQL for data engineering. Holds an M.Sc. in AI & Data Science from AUEB, combining advanced academic foundations with proven industry experience.

SKILLS

Python (PyTorch, TensorFlow, scikit-learn, pandas, NumPy) • SQL (Oracle, MS SQL, PostgreSQL)
ETL (Informatica PowerCenter, IICS, SSIS, Azure Data Factory) • ML/AI (CNNs, NLP, AutoML) • (DataBricks, LakeHouse)
Git • Docker • Power BI • Tableau • REST APIs • Apache Kafka
Java • JavaScript • Node.js • Spring Boot

WORK EXPERIENCE

- Intrum** April 2026 - Present
Data Engineer
- Build and optimize the Data Warehouse (DWH) infrastructure for Intrum Hellas
 - Design and implement scalable data pipelines utilizing Azure Databricks
- Accenture** Nov 2024 - March 2026
Data Engineer
- Build ETL pipelines with Informatica and SQL (Oracle, MS SQL)
 - Implement data quality workflows for production systems
 - Exposure to cloud ETL (Azure Data Factory, IICS)
- DeltaFoods SA** Mar 2024 - Oct 2024
Junior Software Developer
- Developed SQL queries for Power BI dashboards
 - Maintained business applications (C#.NET, PHP)

EDUCATION

- Master of AI & Data Science** Oct 2024 - April 2026
Athens University of Economics and Business
- Bachelor of Informatics & Telematics** Oct 2019 - Sept 2023
Harokopio University of Athens
- Diploma Thesis:** Algorithms for physical activity measurement from smartphone sensors.
[Project](#)
- Erasmus Exchange: University of Malaga, Spain (6 months)

PROJECTS

- Smartphone Activity Recognition - CNNs for sensor data classification
[Project Link](#)
- BloodCall - Google Solution Challenge (Top 10)
[Project Link](#)
- Databricks Pipeline - End-to-end credit risk assessment pipeline built on Databricks Lakehouse
